

Historical review protocol: same-camera model ↔ registered coarse reference

Representative task families use the review pages as experiment-facing evidence: Clean shows the modeled asset, Overlay shows correspondence, and Reference preserves the registered coarse geometry under the same camera.

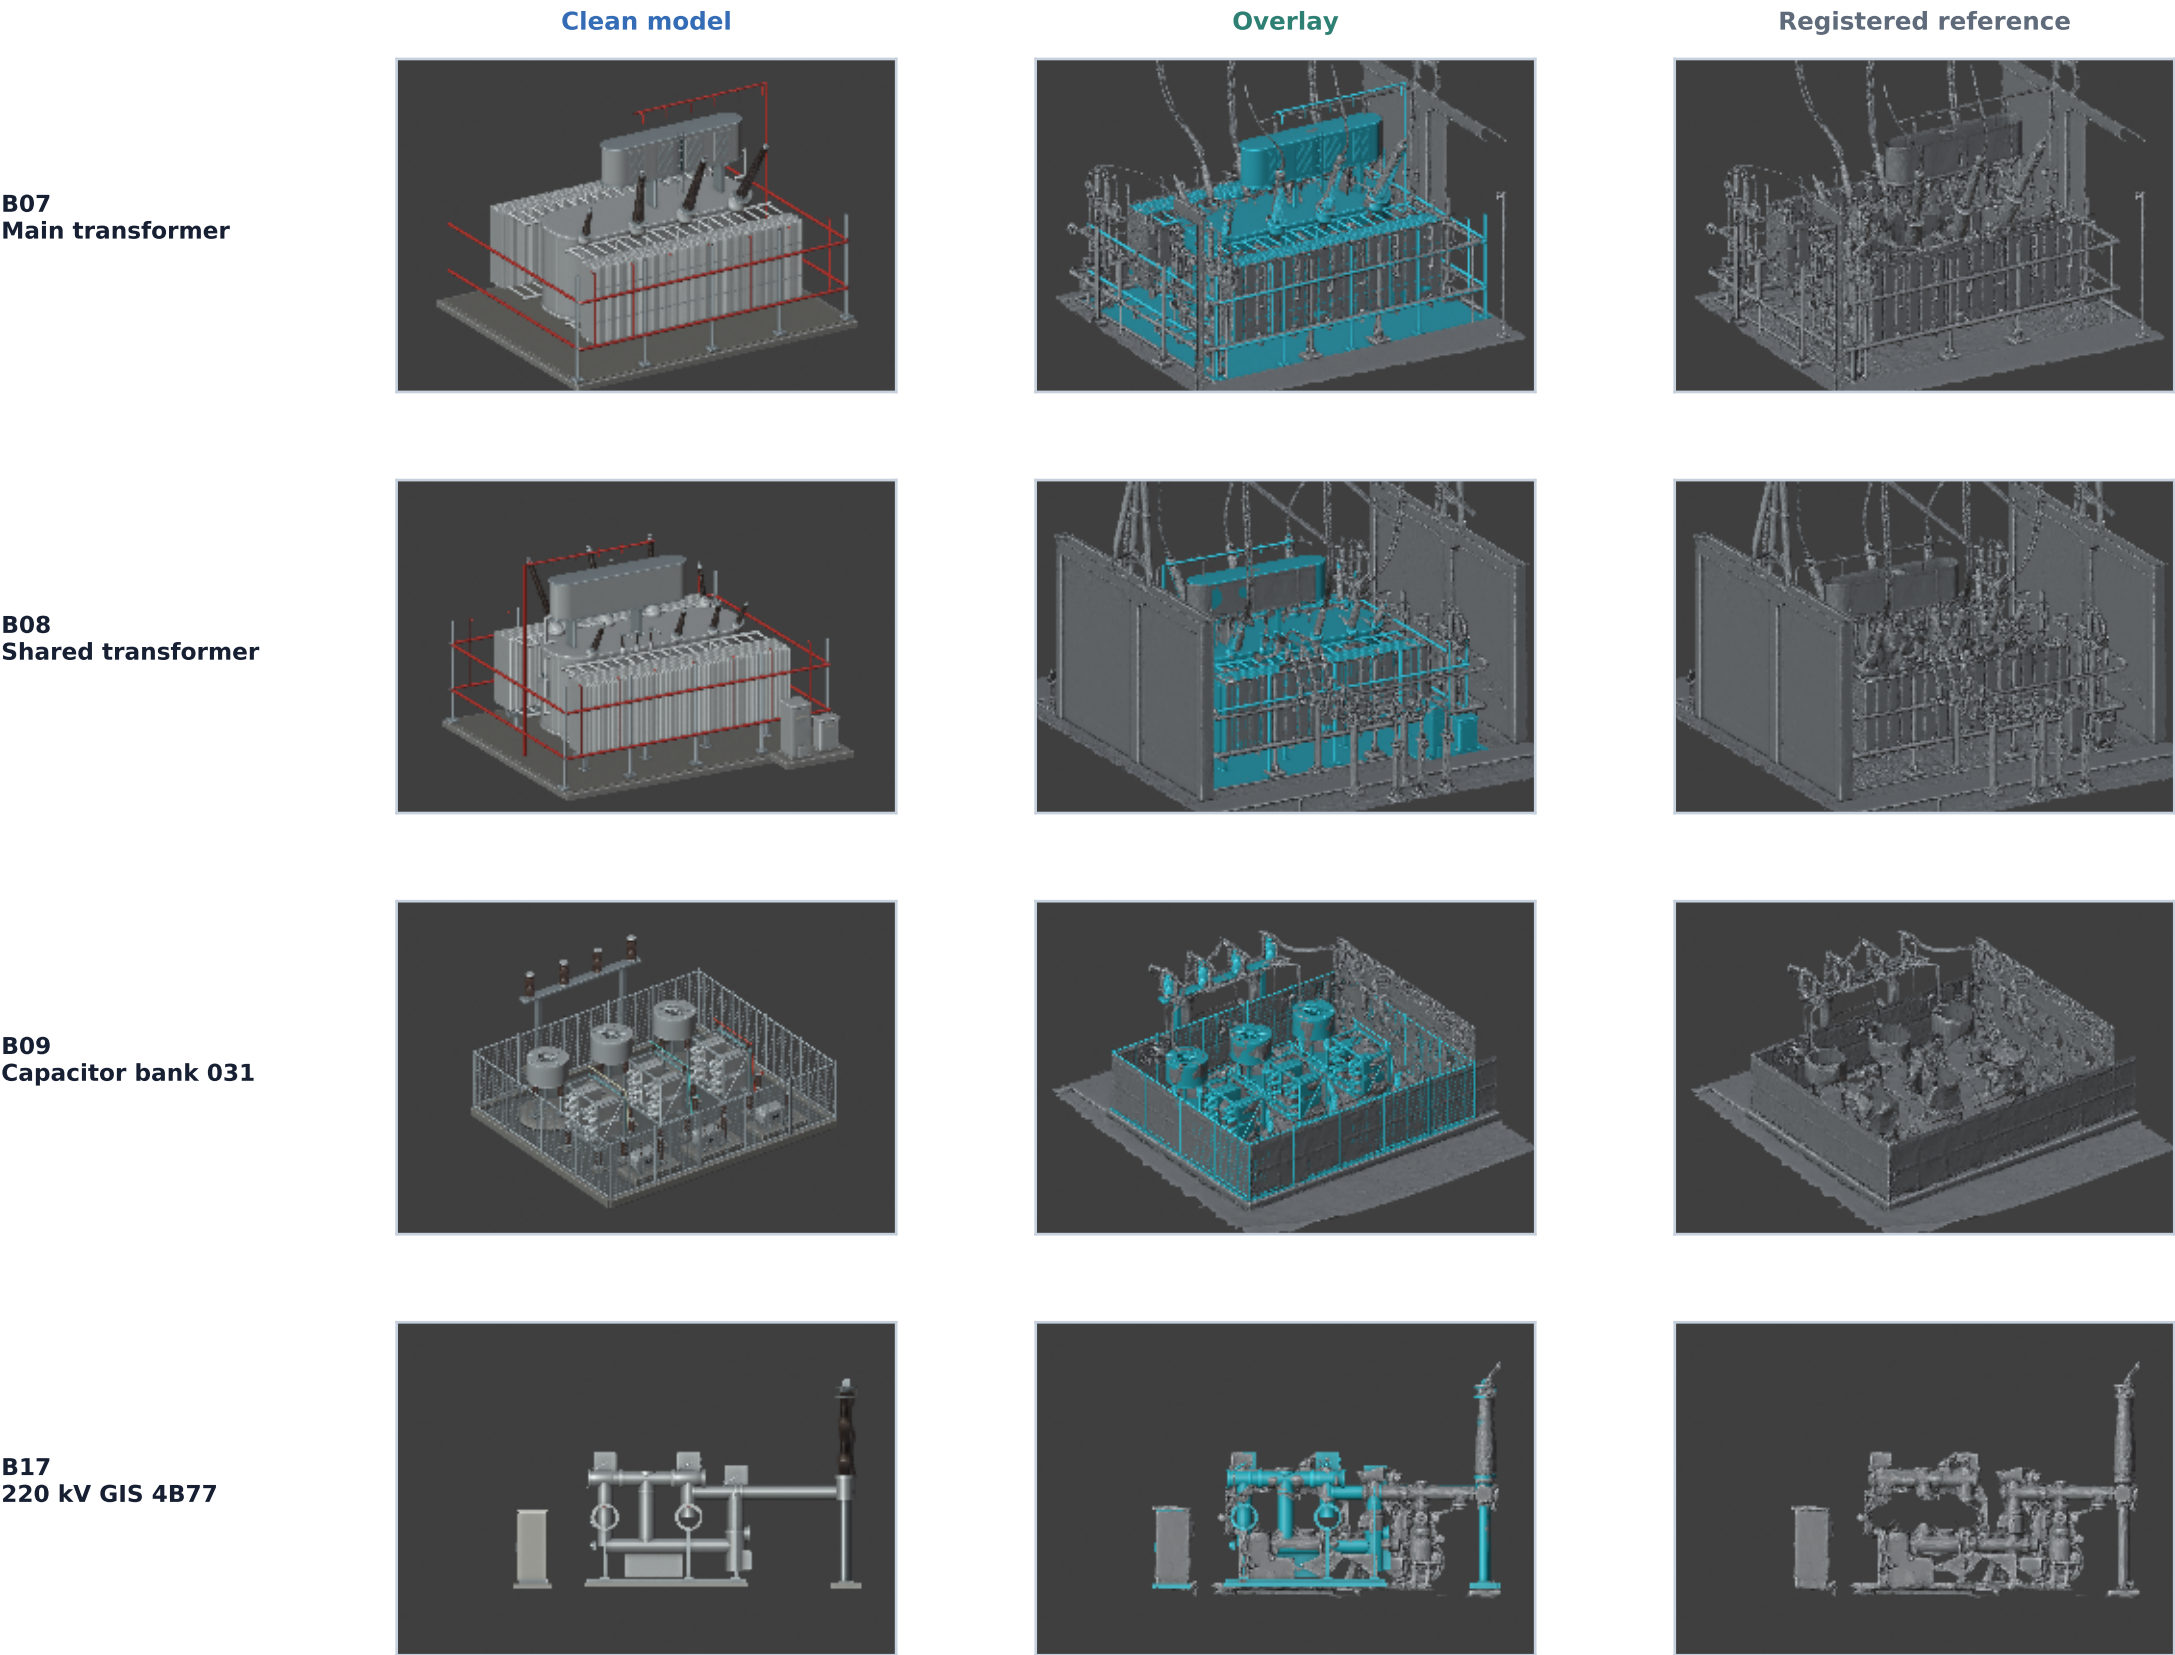

Figure 13 · Representative views extracted from the original batch review artifacts. The companion website exposes all 32 historical review.html pages from B07-D38 so the reader can use each batch's original selectors, sliders, modes, notes and validation context rather than only these static examples.
